

Organize the Stuff

What do you need to organize?

Take some time to think about what you need to organize—curriculum, school supplies, extra books, art supplies, etc.

Where will you put those things?

Think about where you will use the things you're storing. Do you have a specific room to put things? A closet? A shelf? A cabinet? Walk through your home and make a list of where you use things and where you can store them.

What do you need to organize well?

Once again, think about how you use your things and what storage method makes their use most convenient. Do you need containers, shelves, binders, baskets, etc.?
